

Sometimes  
life comes at  
you hard.

## TRANSIENT POVERTY

In sports, a slump is a period when a player or team is not performing well or up to expectations. People often experience slumps. There are many kinds of slumps, but they all involve things going downhill. Temporary poverty, also known as transient poverty, is a short-term condition that occurs when a household experiences a sudden change in income or expenditure. This can be due to factors such as natural disasters, inflation, divorce, or joblessness. The Emergency Aid Coalition is there to pitch in with food, clothing and other essentials to help our clients get back in the game.
